SUMMARY

UI/UX Designer with a Computer Science background, passionate about crafting user-centric digital experiences that are intuitive, accessible, and impactful. Skilled in end-to-end UX processes — from user research and information architecture to high-fidelity Figma prototypes and design-system components. My CS foundation enables seamless collaboration with developers, helping translate design decisions into pixel-perfect implementations. Currently gaining hands-on product experience as a Full Stack Intern where I apply design thinking to real-world web applications.

SKILLS

Design Skills

User Research & Interviews, Wireframing, Prototyping, Usability Testing, Heuristic Evaluation, Information Architecture, User Journey Mapping, Accessibility (WCAG 2.1)

Design Tools

Figma, Fig Jam, Figma Make, Miro, Canva, Maze (usability testing)

Technical

HTML5, CSS3, JavaScript (basics) — enables close collaboration with developers

UI / Visual

Responsive Design, Design Systems, Component Libraries, Visual Hierarchy, Typography, Color Theory, Interaction Design

EXPERIENCE

UI/UX DESIGNER & FULL STACK INTERN | ECHOBRAINS TECHNOLOGIES JANUARY 2026 – PRESENT | BIDAR, KARNATAKA

- Redesigned 3 core product screens by conducting stakeholder interviews and mapping user journeys, reducing user-reported confusion by ~40% in internal testing.
- Built an end-to-end Figma prototype for the company's client-facing web portal, covering 15+ screens with responsive layouts, reusable components, and an accessibility-compliant color system (WCAG AA).
- Collaborated daily with a 4-person development team, creating annotated design specs and component documentation that cut developer handoff queries by 30%.
- Contributed to front-end implementation (HTML/CSS/JS), bridging the gap between design intent and live product — ensuring consistent UI rendering across devices.
- Conducted heuristic evaluations on existing features and presented 12 actionable UX recommendations to the product lead, 7 of which were prioritized for the next sprint.

EDUCATION

BACHELOR OF ENGINEERING (B.E.) IN COMPUTER SCIENCE AND ENGINEERING

GURU NANAK DEV ENGINEERING COLLEGE, BIDAR

2022 – 2026 | CGPA: 9.16 / 10

PROJECTS

Personal Portfolio Website Tools: Figma, Fig Jam, HTML, CSS

- Defined the information architecture and user flow before design, ensuring visitors reach key content (projects, contact) within 2 clicks.
- Created 3 iterations of wireframes and gathered feedback from 5 peers; final high-fidelity design scored 8.5/10 on perceived usability in informal testing.
- Built a fully responsive layout optimized for mobile, tablet, and desktop — achieving a Lighthouse performance score of 92.
- Developed an interactive prototype in Figma with micro-animations and hover states to communicate the final experience to stakeholders before development.

E-Commerce Website Design Tools: Figma, Fig Jam

- Conducted competitive analysis of 5 leading e-commerce platforms to identify UX patterns and pain points before beginning design.
- Created 4 user personas and 2 user journey maps to align design decisions with real shopping behaviors and motivations.
- Designed a streamlined 3-step checkout flow (down from the typical 5–6 steps), reducing cognitive load and targeting a lower cart-abandonment rate.
- Delivered 20+ screens covering product browsing, filtering, cart, checkout, and order confirmation — all with responsive layouts and a consistent design system.

EchoBrains Website Redesign Tools: Figma, FigJam, Miro

- Performed a full heuristic evaluation of the existing website, identifying 9 usability issues across navigation, visual hierarchy, and content clarity.
- Facilitated a card-sorting exercise with 8 participants to restructure the information architecture, resulting in a more intuitive navigation menu.
- Delivered high-fidelity mockups and a responsive layout system using an 8-point grid, improving visual consistency across all pages.
- Reduced the number of navigation items from 11 to 6 by grouping related content — decreasing decision fatigue for first-time visitors.

CERTIFICATIONS

UI/UX Design Certification — Udemy

Topics covered: User Research · Wireframing · Prototyping · Responsive Design · Design Systems · Accessibility

LANGUAGES

English (Professional) · Hindi (Fluent) · Kannada (Native) · Telugu (Conversational)
